

NovaTech Solutions - Company Profile

NovaTech Solutions is a technology company headquartered in Bangalore, India. The company was founded in March 2019 by Priya Sharma and Arjun Mehta. NovaTech specializes in building enterprise automation platforms powered by artificial intelligence.

As of 2024, NovaTech has 350 employees across three offices: Bangalore (HQ), Hyderabad, and Singapore. The company raised Series B funding of \$42 million in January 2023 from Sequoia Capital India and Accel Partners.

NovaTech's flagship product is called AutoFlow, an intelligent workflow orchestration engine that connects to over 200 enterprise SaaS applications including Salesforce, SAP, and ServiceNow. AutoFlow uses a proprietary LLM-based reasoning engine to automate complex multi-step business processes without requiring manual rule configuration.

The company's annual recurring revenue (ARR) reached \$18 million in Q3 2024, growing at 140% year-over-year. Key clients include Infosys, Tata Consultancy Services, and the State Bank of India.

Technical Architecture

AutoFlow's architecture consists of four core layers:

1. **Connector Layer:** Pre-built API adapters for 200+ SaaS tools. Each connector handles authentication, rate limiting, and schema mapping automatically.
2. **Reasoning Engine:** A fine-tuned GPT-4o-mini model that interprets user intent from natural language descriptions and decomposes complex workflows into executable steps.
3. **Execution Runtime:** A distributed task scheduler built on Apache Kafka and Kubernetes that executes workflow steps with exactly-once delivery guarantees and automatic retry logic.
4. **Observability Dashboard:** Real-time monitoring of all workflow executions with LangSmith integration for LLM call tracing, cost tracking, and latency analysis.

AutoFlow processes an average of 2.3 million workflow executions per month across all clients. The median end-to-end latency for a 5-step workflow is 4.2 seconds. The system maintains 99.97% uptime as measured over the trailing 12-month period.

Security certifications include SOC 2 Type II, ISO 27001, and GDPR compliance. All customer data is encrypted at rest using AES-256 and in transit using TLS 1.3.

Leadership Team

Priya Sharma (CEO & Co-founder): Previously led the AI Platform team at Google Bangalore for 6 years. Holds a PhD in Machine Learning from IIT Delhi. Named to Forbes India 30 Under 30 in 2020.

Arjun Mehta (CTO & Co-founder): Former Staff Engineer at Amazon Web Services, where he designed the auto-scaling infrastructure for AWS Lambda. Holds an MS in Distributed Systems from Carnegie Mellon University.

Deepa Krishnan (VP Engineering): Joined from Microsoft Azure in 2021. Manages a team of 120 engineers across backend, ML, and platform infrastructure.

Rahul Verma (VP Sales): Previously Regional Sales Director at Salesforce India. Responsible for growing NovaTech's enterprise client base from 12 to 85 accounts in 18 months.

The company plans to expand to the Middle East market in Q1 2025 and is currently hiring for offices in Dubai and Riyadh.
